TechEthos – Media Package

Overview of existing content

Feel free to dive into the following content for additional insights into our work.

Title	Type	In short
Joining forces with like-minded projects to address ethical and societal issues of new technologies **6 April 2022**	News article	TechEthos established a cluster of 16 EU-funded projects, creating a platform to exchange, collaborate and create synergies. The participating projects work in the field of research ethics or responsible research and innovation (RRI) more generally or on ethical and/or societal challenges of the three technology families TechEthos is focusing on.
The TechEthos approach to horizon scanning **28 February 2022**	Report	This report presents the process of developing a TechEthos-specific ethically- and socially-driven horizon scan approach using critical insights from past and ongoing horizon scan experiences and impact analysis.
Reviewing the Horizon Scan: Selecting the TechEthos Technology Portfolio **14 February 2022**	News article	We present more in more detail the methodology used to select the TechEthos technologies: an ethically- and socially-driven horizon scan.
Introducing the TechEthos Technology Families **21 December 2021**	News article	From over 100 new and emerging technologies to just three technology families. We announce and introduce our final three choices: Climate Engineering, Digital Extended Reality and Neurotechnologies.
Ethics of climate engineering: Don't forget technology has an ethical aspect too **10 November 2021**	Publication	This opinion paper argues that climate change might well be the most important issue of the 21st century and that the world's response, in the form of 'Climate Engineering', is of equal pre-eminent importance.
Spotlight on Research Ethics and Research Integrity for Sustainable Innovation **21 October 2021**	News article	Maura Hiney, *ALLEA Permanent Working Group Science and Ethics*, introduces the concepts of Research Ethics and Research Integrity, and the solutions TechEthos brings in this respect.

Title	Type	In short
Methodology for ethical analysis and scan results of existing ethical codes and guidelines **29 September 2021**	Report	This report reviews three approaches to ethical analysis and explores the process and the result of a scan of ethical guidelines on new and emerging technologies.
A Foundation for Effective Ethics Governance **28 June 2021**	News article	We talk to Lisa Diependaele Policy Officer at the European Commission, to understand the European Commission's vision in the field of the ethics of new and emerging technologies and the role projects like TechEthos can play.
